Anonymous student feedback from my recitation sections at Michigan State University.

MID-SEMESTER TA SURVEY: MTH 133 CALCULUS II, FALL 2024

35 responses from two anonymous paper surveys, combined. Scale: 1 = strongly disagree, 5 = strongly agree.

Item	Mean (1–5)	Agree (4–5)
The TA explained concepts clearly.	4.51	94%
The TA was approachable and willing to answer questions.	4.71	97%
The TA’s teaching methods were effective.	4.49	94%
The TA provided helpful feedback on assignments or questions.	4.26	89%
The TA encouraged active participation and engagement.	4.29	86%
Overall, I was satisfied with the TA’s teaching.	4.66	97%

All 35 forms are included as written. One form circled 1 on every item but wrote only positive comments (likely a reversed scale); excluding it would raise every figure slightly.

SELECTED STUDENT COMMENTS

Verbatim. “Mid-semester recitation survey” is the anonymous TA survey above; “SPLS” is MSU’s end-of-semester Student Perceptions of Learning Survey.

MTH 133 Calculus II, Fall 2024

“I’ve loved math for most of my life and lost it last year when I took AP Calc. I was kind of dreading this class but it made me regain my love for math very strongly.”

Mid-semester recitation survey

“Overall the TA had everything a student wishes for. Helpful, available, cooperative + understanding. . . . The way she’d give us time to challenge ourselves, then she gets into the correct solution was very effective for quizzes as it puts me through the thinking process I need to go through.”

Mid-semester recitation survey

“I liked how at the beginning she had students come up to the board to do the problems so maybe more of that.”

Mid-semester recitation survey

“She lets us attempt to figure out each problem on our own, then she’ll go over it explaining it. Makes it very nice.”

Mid-semester recitation survey

“Having students answer was helpful. Some had similar challenges as me and the TA explained these errors.”

Mid-semester recitation survey

“... the recitations were very nice and allowed time to learn from our mistakes.”

End-of-semester SPLS

“Her review sheets for each topic and her explaining them is extremely helpful.”

Mid-semester recitation survey

“Dilan’s worksheets and explanations of how to solve problems slightly differently than [the lecturer] was also very helpful because it made it easy to look at some topics from a different perspective.”

End-of-semester SPLS

“She seems to understand the material thoroughly and she was able to put it in words that were easy to understand.”

Mid-semester recitation survey

MTH 299 Transitions, Fall 2025

“The recitations were very supportive, both TAs were passionate about helping students learn.”

End-of-semester SPLS

“Recitations helped my understanding a lot by getting to work out problems with other students and having the TAs explain thoroughly.”

End-of-semester SPLS

“I knew exactly where to go when I needed help for items outside of class, and felt like there was a small community of people who often went together to the help room to get things like homework and studying done. Through this, I felt like I built a good bond with the instructors as well as the T.A.’s which helped my morale within this class.”

End-of-semester SPLS
