

Three Aspects of Teaching

In your group, discuss **all three**: what did you observe, and what will you do next week?

1

Clarity & Delivery

- Board layout and readability
- Voice, pacing, time traps

How will you organize your board and your time?

2

Communication & Language

- Microaggressions (“trivial,” “obviously”)
- Asking questions and wait time
- Responding to student questions and answers

How will you ask, and how will you respond?

3

Engagement & Cohort Needs

- Getting students doing the math
- Tone and approachability
- Freshmen vs. seniors

How will you launch an active moment for your cohort?

REFLECT TOGETHER

What is one teaching component you will deliberately focus on in your mock teaching next week?

Which part of teaching stresses you out the most?

Handling silence, board space, unexpected questions, staying on time

Which part do you feel most confident handling?

Explaining core concepts, setting a warm tone, encouraging struggling students
